

Export Certification.

Here is a printable list of highlights of the Export Certification process in PDF format.

Click the printer icon to print the list for your future reference.

Export Certification Process

1. IPP receives an applicant's signed, completed 9060-6 requesting export certification.
2. IPP consults the Export Library to confirm eligibility of the product and establishment, verifies the documents the applicant provided, and signs the 9060-6.
3. IPP issues the applicant a blank 9060-5 to complete and an Export Stamp for the applicant to affix to each product container.
4. IPP re-inspects the product for compliance with requirements and any damage or adulteration, and signs the applicant's completed 9060-5.
5. IPP retains a copy of the signed 9060-5 for the FSIS file and gives the remaining copies to the applicant to accompany the exported product.
